KB network intelligence pipeline

From conversations to approved outreach. Every move up a layer passes a management gate. Internal working draft, 17 October 2026.

Review rhythm. Gates 1 to 3 are batched into a daily or weekly Slack digest for the management team. Gate 4 runs per message.

Read-only intelligence. The opportunity agent reads documentation, ecosystem and client portal but never writes to them. Only approved outcomes flow back via layer 7.

Channels. Audience-to-channel mapping in layer 6 is a suggested default, to be adjusted per relationship.
