Requirements: Job portal / talent hub

Client: company of Joost and Joyce **[TBD: legal name, see OQ-5]**
Last updated: 7 October 2026 | Sources: voice note 7 Oct 2026 (transcribed), chat clarifications 7 Oct 2026

Scenario overview

Actor	Scenario
Affiliated student	Partner sends data to admins, admins upload profile, student completes profile and applies. Free.
Non-affiliated student	Self-registers and pays for job board access. TBD, long term.
Agency recruiter	High volume of posts and headhunting. Pilot free, then credits and posting tiers.
Direct employer	Mainly posts vacancies, little headhunting. Same base as agency with small differences.
Supplier	No login. Sends student data to admins.
Super admin / admin	Manage platform; admins with technical limitations.

1. Functional requirements

ID	Requirement
FR-01	The platform supports these roles: super admin, admin, student/candidate and client. Clients are split into two types: agency recruiter and direct employer.
FR-02	Super admins (K.B: Tom, Youri, Robin) have full control over the platform, including users, roles, content, pricing, access rules and system settings.
FR-03	Admins (company owners: Joost, Joyce) can manage the platform with small technical limitations. Working assumption: content, users and pricing allowed; system settings, integrations and role assignment reserved for super admins. **[TBD: exact split, see OQ-1]**
FR-04	Admins can create student profiles in bulk from data supplied by the supply chain partners (JongLeren, StageInSpanje). **[TBD: data format and delivery, see OQ-4]**
FR-05	Each student profile is linked to its source partner (JongLeren, StageInSpanje or non-affiliated).
FR-06	Students can complete and update their profile, upload information, search jobs and apply to them.
FR-07	Affiliated students (alumni of a supply chain partner) have full student access free of charge.
FR-08	Non-affiliated job seekers can register themselves and buy access to the job boards. **[TBD: pricing, scope and phasing, see OQ-2]**
FR-09	Clients can browse an anonymised candidate pool showing work-relevant experience only. Personal and contact data stay hidden until the profile is unlocked.
FR-10	Clients buy monthly credit bundles (example: 10 EUR per month for X credits). One credit unlocks one candidate profile.
FR-11	Unused credits expire at the end of each monthly period and do not roll over.

ID	Requirement
FR-12	Unlocking a profile immediately reveals the candidate's personal and contact data to that client, enabling outreach.
FR-13	The same candidate can be unlocked independently by multiple clients; each unlock consumes a credit from the unlocking client.
FR-14	Clients can post vacancies within the limit of their job posting tier (examples: 2 jobs per month, 10 jobs per month).
FR-15	Job posts can be promoted on the platform. **[TBD: what promotion means, see OQ-8]**
FR-16	Credits and job posting tiers can be sold separately and as a combined bundle.
FR-17	Agency recruiters and direct employers share one client base, with configurable differences per type in features, page access and subscription options. **[TBD: specific differences, see OQ-9]**
FR-18	Admins can configure plans, prices, credit amounts, posting limits and page access per role and client type (the owners can reshuffle the offer).
FR-19	Admins can grant individual clients free, trial or proof-of-concept access for a set period (initially 3 months), configurable per client depending on when they join.
FR-20	Admins can move a pilot client to a paid plan with individually agreed terms once the pilot ends.
FR-21	Clients can pay for subscriptions, credit bundles and posting tiers online. **[TBD: payment provider and invoicing, see OQ-6]**

2. Non-functional requirements and restrictions

ID	Requirement
NFR-01	Student flows (upload information, find jobs, apply) must be very straightforward and usable without guidance.
NFR-02	Client flows (viewing candidates, placing jobs) must be easy to use for partners and clients.
NFR-03	Pricing and access configuration (FR-18) must be changeable by admins without code changes, so the business model can be adjusted during and after the pilot.
NFR-04	**Restriction:** candidate personal and contact data must never be visible to a client before that client has unlocked the profile.
NFR-05	**Restriction:** affiliated students must never be charged.
NFR-06	**Restriction:** supply chain partners (suppliers) have no portal login; all their data enters through admins.
NFR-07	**Restriction:** admins cannot perform actions reserved for super admins (FR-03).
NFR-08	Data protection compliance for candidate data, including consent to share personal data with unlocking clients. **[TBD: not discussed yet, see OQ-7]**

3. Out of scope

ID	Requirement
OOS-01	Placement tracking, placement confirmation and placement fees. The model is access based only.
OOS-02	Supplier self-service portal or supplier accounts.

Open questions

ID	Question
OQ-1	Exact technical limitations of the admin role versus super admin (blocks final FR-03, NFR-07).
OQ-2	Non-affiliated job seekers: price, billing model (one-off or subscription), what it unlocks, and whether it is in the first release or a later phase (blocks FR-08).
OQ-3	Post-pilot commercial terms per pilot client, to be agreed during the pilot (affects FR-20).
OQ-4	In what format and how often do JongLeren and StageInSpanje deliver student data (e.g. Excel, CSV, CVs as files)? Is a bulk import tool needed or manual entry acceptable? (blocks FR-04)
OQ-5	Client legal name and project name for the contract.
OQ-6	Preferred payment provider, invoicing and VAT handling for clients across countries (blocks FR-21).
OQ-7	GDPR: how candidates consent to their data being shared on unlock, data retention period, and right to delete or hide a profile (blocks NFR-08).
OQ-8	What does promoting a job post involve (featured placement, longer visibility, outreach to candidates)? (blocks FR-15)
OQ-9	Which specific features or pages differ between agency recruiters and direct employers? (blocks FR-17)
OQ-10	Do candidates get notified when they are unlocked or contacted, and can they decline contact?

Commercial notes (for contract intake)

• Example credit pricing: 10 EUR per month for X credits (X to be set).
• Example job posting tiers: 100 EUR for 2 jobs per month, 500 EUR for 10 jobs per month. Business model still to be validated.
• First 3 months: clients (agencies and employers) get maximum free access, as free use, trial or proof of concept depending on entry stage.
• Initial pilot clients: Top Jobs Abroad and the agency recruitment partner in the Dutch healthcare sector, both free for proof of concept.
• Post-pilot terms to be negotiated per partner during the pilot.
